

TECHNICAL DATA

AUTO DISHWASH OC

Organic Liquid Machine Dishwash

DESCRIPTION

Auto Dishwash OC is a non-chlorinated commercial dishwashing compound designed for use through automatic dispensing systems. This product is strongly alkaline so it effectively removes grease and other soils in all types of water conditions.

Auto Dishwash OC does not contain phosphates and all surfactants are biodegradable. All ingredients are on the Organic Production Systems Permitted Substances List as per CAN/CGSB 32.311-2015. Published November 2015, Amended March 2018, Section 7.

DIRECTIONS

Apply **Auto Dishwash OC** with automatic dispensing equipment at a rate of approximately 2-3 mL per liter of water. Quantities may vary based on water quality (hardness) and soil load.

Auto Dishwash OC is a strongly alkaline product and should not be used to clean soft metal surfaces such as aluminium.

CONTAINS

Potassium Hydroxide and Organic Surfactants.
